Section B (60 marks) [each spelling mistake -2 marks; each punctuation mistake -0.5 marks; max -2 marks]

There are more than 35 species of dolphins. Dolphins may look like fish, but they are not fish. They are mammals, just like polar bears, elephants and humans. They are very clever and are quick to learn. They eat a lot of sea animals but mostly fish and squid.

Dolphins are known for their playful behaviour and ability to swim fast. Some dolphins can leap out of water and enjoy following ships. They live in groups. They like swimming and hunting together.
